Allowable Subject Matter

1. Claims 3-4 & 9-14 are allowed. The following is an Examiner's statement of reasons for allowance:

Claims 3-4 & 9-14 are considered allowable since when reading the claims in light of the specification, no prior art reference alone or in combination with other prior art references disclose or suggest the combination of limitations specified in the independent claims including:

said network controller sends information in both the first type of packets and the second type of packets to said first processor if a connection in said device has not been established, and said first processor provides said network controller with information for detecting said second type of packets when a connection with said device is established as specified in claim 3.

said detector determines that information in the first type of packets and the second type of packets is to be sent to said first processor and said second processor respectively conditioned on said detector receiving said notification signal from said first processor as specified in claim 9

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
